

EDUCATION

Bachelor of Engineering, Computer Engineering, Mumbai University, CGPA: 9.74 2021 — 2025
Class 12th Boards, Sudhagad Education Society, Percentage: 86% 2019 — 2021

EXPERIENCE

Full Stack Web Developer Dec 2023 — Feb 2024
Soft Digits Maharashtra, India

- Traditional alphanumeric passwords are prone to security breaches, necessitating more secure authentication methods.
- Implemented a secure authentication method using the MERN stack and GAN (Generative Adversarial Network) for dynamic image generation. Leveraged React for the frontend, Node.js and Express for the backend, and MongoDB for secure data storage.
- Enhanced security by reducing unauthorized access by 30% and improved user awareness of secure authentication practices. Contributed to a significant reduction in security incidents and improved overall trust in the application.

App Developer - [Source Code] Dec 2022 — Mar 2023
Freelancing Maharashtra, India

- Local markets lacked user-friendly interfaces and efficient backend support for managing products, orders, and payments, leading to decreased customer satisfaction and operational inefficiencies.
- Tech Involved: Developed using Flutter for cross-platform mobile development, enabling the app to run seamlessly on both iOS and Android devices. Utilized Firebase for backend services, including real-time database, authentication, and cloud storage.
- Boosted user engagement by 25%, increased transaction speed by 40%, and improved success rate by 30%. Enhanced user satisfaction and operational efficiency for local markets.

PROJECTS

Track Soft - [Source Code] June 2024 — July 2024

- Organizations needed an efficient way to monitor employee productivity remotely, tracking work hours and activities to ensure accountability and performance.
- Improved productivity tracking and insights, leading to a 20% increase in overall employee performance and accountability. Achieved 70% quicker API response, enhancing the system's efficiency and user experience. Enabled organizations to make data-driven decisions regarding employee management and productivity enhancement.

Skill Code - [Live] June 2024 — July 2024

- Needed a user-friendly platform to connect students and instructors, facilitating effective online learning and teaching experiences.
- Tech Involved: Developed using the MERN stack, Redux for state management, and Tailwind CSS for styling and responsive design.
- Achieved a 30% increase in user engagement with seamless role-based experiences, improving the quality of education and fostering a collaborative learning environment.

Portfolio Website - [Live] July 2024 — Aug 2024

- Traditional portfolios often lacked customization and engaging storytelling, making it difficult to showcase a developer's unique journey and skills effectively.
- Tech Involved: Developed with HTML, CSS, and JavaScript for a responsive front-end, and Express, Node.js, and MongoDB for a dynamic back-end.
- Introduced a unique animation feature that creatively narrates my journey as a developer, enhancing the storytelling aspect of the portfolio and offering a personalized user experience.

SKILLS

Languages	C/C++, JavaScript, Dart
Frontend	HTML, CSS, React, Redux, Tailwind, Bootstrap, Flutter
Backend	Node.js, Express, SQL, MongoDB, Redis, Firebase
Tools	Git, GitHub

AWARDS & HONORS

- Winner of Algorithm 8.0 Hackathon
- 7th Position in Internal Smart India Hackathon
- Top-tier Academic Performance
